SUMMARY

Software Tester with 1 year of experience in both manual and automation testing. Proficient in Java, Selenium, Postman, and SQL with expertise in functional, regression, integration, and cross-browser testing. Skilled in creating and executing detailed test cases, identifying and reporting bugs using JIRA, and ensuring their timely resolution. Experienced in working within an Agile environment and conducting smoke and retesting to maintain software stability. Strong knowledge of the healthcare domain and experience in testing complex healthcare applications.

WORK EXPERIENCE

CKS Info System Private Limited |Software Tester   **March 2024– Persent**

- Performed functional, regression, and integration testing on web and mobile applications.
- Developed and executed automation scripts using Java and Selenium to enhance testing efficiency.
- Conducted API testing using Postman to validate request and response accuracy.
- Created and maintained comprehensive test cases, ensuring test coverage and software quality.
- Reported and tracked defects using JIRA and ensured timely resolution.
- Performed smoke and retesting to confirm software stability post-fixes and releases.
- Validated data consistency and integrity using SQL queries.

Tron Softech | Software Tester Intern   **October 2023 – February 2024**

- Assisted in developing and executing automated test scripts using Selenium and Java.
- Conducted manual testing to identify and resolve bugs, improving overall product quality.
- Performed functional and regression testing to verify system behavior and consistency.
- Supported cross-functional teams in analyzing requirements and creating test plans.

EDUCATION

B.E (Computer Engineering)   **2023**

Form Pune University
- Passing Year 2020-2023
- SGPA 7.58

POLYTECHNIC (Information Technology)   **2021**

Form Maharashtra State Board Technical
- Education Passing Year 2016-2020
- Per 66.56% .

SKILLS

- **Technical Tools:** Selenium, Postman, JIRA, playwright,
- **Languages**: Java, SQL,Python
- **Databases**: SQL
- **Methodologies**: Agile, Scrum

PROJECTS

Healthcare Management System – CKS Info System Private Limited
- Performed manual and automation testing on hospital management system software, consisting of 200 modules, with 45 operational modules currently in use.
- Designed and executed comprehensive test cases to ensure functional and nonfunctional requirements.
- Identified, documented, and tracked bugs using a structured bug reporting system.
- Automated testing workflows using Java, Selenium, and SQL, enhancing test coverage and reducing execution time.
- Conducted API testing with Postman to validate backend functionality and integration.
- Executed retesting, smoke testing, and ensured system stability post-deployment.
- Collaborated with cross-functional teams to deliver quality software within tight deadlines.
- Tested healthcare workflows, including patient registration, appointment booking, and billing.
- Ensured data consistency and functional accuracy by validating backend databases using SQL.
- Automated critical test cases using Selenium to reduce manual effort.

Digital Leave Tracking System – BE Project
- Developed an online leave management system to automate leave approval and tracking processes.
- Ensured security and confidentiality of user data through encryption and secure access.
- The online leave management system application is a web based system.
- A leave management system is a process within in college that determine howleave is retested by stuff and approved by higher authorities.

Mobile Data Self Encryption System – Diploma Project
- Developed a mobile data encryption system to protect sensitive data even if the device is lost.
- Enabled secure data storage and access for mobile users, preventing unauthorized access.
- This projects allows users to store sensitive data on their mobile phoneswithout having to worry about is confidentiality even if the mobile is lost.
- This system is developed so that employees and other mobile users can store and operate on sensitive data on their mobile phones without having to worry of it being leaked

CERTIFICATIONS

- **Python** – SevenMentor Python Classes
- **Machine Learning** – Symbiosis Distance Learning
